### **Coronavirus (COVID-19) Update – April 7, 2020**

*City reports cases of COVID-19 in Helotes*

Bexar County and the Helotes Office of Emergency Management have reported two cases of COVID-19 in our community. City leaders were recently notified of the positive tests. We have one additional case and under investigation. In addition, another individual is reported to have recovered. Additional information about these cases is not available.

This information is being shared to reemphasize the importance of following the County's Executive Order and Stay Home, Work Safe measures. The simple fact is that COVID-19 is in our community and will likely continue to spread within our region. Everyone should work together to stop its spread. Our success will be a direct result of us all working together.
